IBRAHIM ALI SALEH AL-SOWIDI

Graphic and UI/UX Designer | UX Research and Strategy | Design Systems | Front-End Development

Yemen | Remote | Phone: 780090877 | Email: ibrahimalsowedi@gmail.com

PROFESSIONAL SUMMARY

Graphic and UI/UX Designer and Information Technology student with hands-on experience across digital product design, UX research, brand identity, visual communication, and front-end development. Progressed from junior-level responsibilities across team projects to serving as Project Manager and Senior UI/UX Designer / Design Lead for a government-sector graduation project. Experienced in the full product design lifecycle, including requirements gathering, UX strategy, information architecture, user flows, wireframing, advanced UI design, responsive design, prototyping, design systems, developer handoff, and design QA.

CORE COMPETENCIES

UX Research | UX Strategy | Requirements Gathering | User-Centered Design | User Flows | Information Architecture | Use Cases
Wireframing | Advanced UI Design | Responsive Design | Interactive Prototyping | Design Systems | Component-Based Design
Design Documentation | Developer Handoff | Design QA | Visual Hierarchy | Usability Thinking | Visual Communication
HTML | CSS | JavaScript | React | Tailwind CSS | Responsive Front-End Development | Design-to-Code Workflow

PROFESSIONAL EXPERIENCE

Project Manager and Senior UI/UX Designer / Design Lead

Government-Sector Graduation Project - Social Insurance and Pensions Management System | 2026 - Present

- Selected specifically to participate in a four-member team developing a government-sector Social Insurance and Pensions Management System.
- Manage overall project direction, major project decisions, team responsibilities, task coordination, priorities, and delivery quality.
- Lead system analysis and gather functional and user requirements through interviews, research, and stakeholder-oriented analysis.
- Define system workflows, user journeys, information architecture, UX strategy, interface structure, navigation, and interaction patterns.
- Own the complete design output, including visual identity, responsive pages, reusable components, variants, and a scalable Design System.
- Prepare developer-ready Design Handoff, document specifications, and review implementation consistency through Design QA.
- Collaborate on a secure web-based solution implemented with Oracle APEX.

UI/UX Designer and Front-End Developer

HALLA - Service Application | 2025 - Present

- Work primarily as the product designer and front-end developer for a service-oriented digital application.
- Design the application user experience and interfaces in Figma and develop responsive front-end interfaces.
- Collaborate with the project team on product decisions, implementation, and preparation for public release.

Lead Designer, UX Analyst and Researcher

Fix Aal-Khat - Service Application | 2024

- Served as the main designer, analyst, and information-gathering lead within a private project team.
- Conducted product analysis and developed the complete Use Case structure, Design System, Visual Identity, and interactive Prototype.

Product Lead and UI/UX Designer

LifeOS - Lifestyle Application | 2026

- Lead product direction, product analysis, UX planning, comprehensive Use Cases, Design System, Visual Identity, interactive Prototype, and product design decisions.

Lead UI/UX Designer and Product Analyst

KickSphere - Mobile Application | 2026

- Led product analysis and UX/UI design, including Use Cases, Design System, Visual Identity, and interactive Prototype.

SELECTED PRODUCT DESIGN PROJECTS

- Madar - Digital product concept focused on clear navigation, user journeys, and accessible mobile interface design.
- Mizan - Product UX/UI concept with structured information architecture, interface consistency, and design system thinking.
- Afiya - Health-focused mobile application concept emphasizing clarity, usability, and intuitive user interactions.
- SkillPathe - Learning and skills-development platform concept featuring organized learning flows and progress-oriented UX.
- Wasel - Service-oriented digital product concept focused on streamlined user journeys and responsive interface design.
- Namaa - Digital product concept developed around approachable visual language, reusable components, and mobile UX.

DESIGN SYSTEMS

- Build structured and scalable design systems using Design Tokens, color systems, typography systems, spacing systems, grid systems, and reusable UI components.
- Create component variants, component properties, Auto Layout structures, responsive components, reusable patterns, interaction states, and consistent cross-screen behavior.
- Document design systems to support maintainability, development alignment, and consistent product implementation.

DESIGN HANDOFF AND DEVELOPER COLLABORATION

- Prepare structured Figma files, component and layer organization, responsive specifications, interaction specifications, and design documentation.
- Prepare assets and exports, including SVG and PNG files, typography and spacing specifications, developer notes, and prototype demonstrations.
- Perform Design QA and use front-end implementation knowledge to improve designer-developer collaboration.

FRONT-END DEVELOPMENT

- Able to independently build complete, responsive websites and interfaces using HTML, CSS, JavaScript, React, and Tailwind CSS.
- Apply component-based development and Design-to-Code workflows to translate product designs into functional responsive interfaces.
- Selected projects: Eventopia, Travel Website, Gym Website, multiple Portfolio Websites, and multiple UI / front-end use cases.

DESIGN, CREATIVE AND PROJECT TOOLS

- Design and Creative: Figma, Affinity Designer, Affinity Photo, Affinity Publisher.
- Collaboration and Project Management: Notion, ClickUp, Trello, Asana, GitHub, Figma Collaboration, task management, team documentation, project coordination, and developer collaboration.

AI-POWERED DESIGN WORKFLOW

- Analysis and Research: ChatGPT, Manus, Gemini.
- Visual Exploration and Image Generation: Midjourney, Leonardo AI.
- Prototyping and Design Workflow: Stitch, Figma AI Tools, Canva AI Tools.
- Applications: UX research assistance, design ideation, concept exploration, visual direction, moodboard creation, prompt engineering, image generation, asset creation, rapid prototyping, content exploration, workflow optimization, and design refinement.

EDUCATION

Bachelor of Information Technology
Sana'a University | 2023-2024 - Expected Graduation: 2026-2027 | Currently in the fourth year

CERTIFICATIONS

- Google - UI/UX Design Certificate
- Canva - Design Certificate
- Adobe - Design Certificate
